- ✓ Text-indexed enterprise search across common repositories
- ✓ Automatic email filing
- ✓ One lens to all relevant information
- ✓ Displays Esri ArcGIS map data alongside related documents and assets

M-Files®

The DocSmarter Way to Work.

Microsoft Strategic Partnership

Microsoft has announced a strategic partnership with M-Files, bringing Microsoft-managed storage together with M-Files' metadata-driven structure, helping businesses work smarter, stay compliant, and get AI-ready.

What exactly is M-Files?

At its core, M-Files is a smart content management system that organises and finds your information based on what it is, not where it's stored. It keeps everything secure, searchable, and accessible from anywhere.

How can I learn more?

Get in touch with the DocSmart team - they're New Zealand's Premier Elite M-Files partner, with 14+ years and over 200 implementations under their belt. They'll walk you through how M-Files works and explore how they can help your business.
